

APPENDIX D: RAPID DAMAGE ASSESSMENT

<Insert Community Name>

COMMUNITY DISASTER TEAM

Under no circumstances should you put yourself or others at risk in order to fulfil this task.

If required, the LDCC will request that a Rapid Damage Assessment is undertaken. This should not be progressed without authorisation from the LDCC. Please be aware of possible risks of undertaking a Rapid Damage Assessment, which could include fallen live power lines, fallen trees, flooding, debris, hot ash, burning logs etc

A Rapid Damage Assessment is designed to assist the Tablelands LDCC with vital information that may be affecting your area after a disaster event. It should provide the Tablelands LDCC with accurate information for an adequate response to life-threatening situations, a quick analysis of the potential hazard to critical infrastructure and to determine the priorities for the deployment of resources.
